PROFESSIONAL SUMMARY

Backend Engineer with 5+ years building scalable microservices in Java and Spring Boot. Expertise in Azure SQL Server optimization, REST API design, and event-driven architectures with Apache Kafka. Proficient in TDD/DDD, CI/CD pipelines (Jenkins, GitLab), Kubernetes, and Azure cloud infrastructure. Shipped production systems serving millions of users.

CORE COMPETENCIES

- **Backend:** Java (17, 21), Spring Boot, Spring Framework, REST APIs, Microservices, JPA, Hibernate
- **SQL & Databases:** Query Optimization, Indexing, Performance Tuning, Execution Plan Analysis, Azure SQL Server
- **Distributed Systems:** Apache Kafka, Event-Driven Architecture, Asynchronous Processing, Fault-Tolerant Messaging
- **CI/CD & DevOps:** Jenkins, GitLab CI/CD, Kubernetes, Docker, Git, Automated Testing, Infrastructure as Code
- **Cloud:** Microsoft Azure, Cloud-Native Architecture, Containerization
- **Engineering:** TDD, DDD, Clean Code, System Design (HLD/LLD), Code Reviews, Agile
- **AI-Assisted Development:** Windsurf, Claude Code, Devin Desktop, Codex, Cursor

PROFESSIONAL EXPERIENCE

Senior Software Engineer | OneTrust | Bangalore, India | Aug 2021 – Present

- **Designed and built two microservices from scratch** using Java, Spring Boot, and REST APIs. Took them to production and maintained long-term ownership. Services handle millions of requests daily with high availability and reliability.
- **Optimized Azure SQL Server performance** through execution plan analysis, strategic indexing, and query refactoring. Reduced database resource utilization by 30% and improved API response times by 40%.
- **Architected Apache Kafka-based event-driven pipelines** processing millions of events daily. Implemented retry mechanisms, idempotent processing, and fault-tolerant messaging patterns. Managed consumer lag and ensured 99.99% message delivery reliability.
- **Built asynchronous data export workflows** processing millions of customer records, integrating relational databases and cloud storage for enterprise-scale delivery.
- **Developed data export tool with Azure Blob Storage** enabling customers to reliably access and download their data at scale. Integrated with backend services to provide seamless data delivery to enterprise customers.
- **Engineered SQL indexing optimization tool** that dynamically scales database performance by intelligently adding and removing indexes based on query patterns. Maintained zero-downtime operations while optimizing database resources in production environments.
- **Worked in CI/CD environments** with hands-on experience in Jenkins and GitLab CI/CD pipelines. Collaborated with DevOps teams on Kubernetes cluster deployments and infrastructure management. Enabled safe and continuous delivery practices.
- **Engineered zero-downtime database migration** addressing critical production scalability bottleneck: primary key integer overflow (2 billion+ rows, 10M monthly incoming traffic). Orchestrated complex solution: disabled Kafka consumers, created new table with next-generation ID scheme, migrated data while managing live traffic reduction. Handled intricate SQL operations in production with all constraints intact, ensuring zero downtime and data integrity throughout migration.
- **Practiced TDD and DDD methodologies** throughout development. Built comprehensive unit and integration test suites. Established testing frameworks and clean code practices across the team.
- **Troubleshoot production issues** spanning distributed system failures, database performance bottlenecks, and message queue problems. Debugged and resolved complex bugs in production environments.
- **Mentored junior engineers** on backend development, system design, and production best practices. Conducted code reviews ensuring engineering excellence.

Software Engineering Intern | OneTrust | Bangalore, India | Mar 2021 – Jun 2021

- Resolved production bugs in Spring Boot REST APIs and automated BDD test flows using Java, Selenium, and Appium.

EDUCATION

Bachelor of Engineering in Computer Science | KLE Technological University | Hubballi, India | Aug 2017 – Apr 2021 | GPA: 8.67/10.0
